Subject: Re: Items from Thursday's call

Thanks Steve.

We have started working on the presentation and have formulated the framework for the presentation.

I will send everybody on Thursday a high level overview of the framework to provide feedback prior to completing the presentation draft.

In addition, you referenced the Netlogix presentation in Boston. Could you please forward this as well to extract the salient points that have been already presented to CMS.

Cheers

All,

As we discussed Thursday last week, attached was my first presentation to executive staff including Governor's office in Illinois around March of last year. The high level concepts are still pretty true and I think the story has been clarified greatly over the last year. This was obviously told from an Illinois centric perspective and we need to be sure to mold the new story into one that includes benefits both for both states so it appeals to both state specific audiences as well as the Feds. I think the Boston MESOC presentation Netlogix created would also be another document which could lend value to the final presentation.

I am also including the Decision Memo we used internally to validate the need to move forward with the Michigan Alliance which may add to the discussion. In addition, I am including our Annual Report section regarding the MMIS we include to the Legislature regarding our MMIS upgrade project in case any verbiage there may be useful.

Best,

Stephen
