

In describing American politics, Ralph Nader said it best, that; "The ONLY difference between the Republican and Democratic parties is the velocity with which their knees hit the floor, when corporations knock on their door". And there was no better example of this, than last month's pandering and groveling board meeting.

It was however, kind of the board to allow those who regularly speak for their rights, who had been relegated to the back of the bus, to once again be allowed to sit up front with our visiting dignitary.

A few years back, this board helped provide a hundred million dollars in our tax money to a predatory one percenter that pocketed the money, then borrowed to build a 27000 acre wind turbine cluster that he then sold for god knows how much profit. Now you once again bow to these same masters, eagerly awaiting the next pat on the head.

October's board meeting was quite a show. Our honored guest, attorney Mike Blazer, spoke as though the corporation which he represents, was a benevolent corporate citizen. To highlight this, he repeatedly gushed of the close association with our own legal council and the volumouse transfer of documentation from out council, pertaining to the suffering families.

One has to wonder about such transfers and question whether our council will be as generous with the afflicted Hartke family, in providing their document needs. Or will the Hartke's be forced like all other parties involved in this fiasco, to beg through the freedom of information act, for documents that are regularly denied and who have, as an intimidation tactic, been labeled "potentially violent" by our legal council.

Mr. Blazer's cozy relationship with our legal council is so great that at one point, he even turned to our council for clarification of his own affairs, a most curious exchange. But not as curious as Mr Blazer, leading us to believe that there were two families in litigation against his firm, only to recant as to only one, when asked.

This kind of spin continued, as he stated that the afflicted parties had refused access to their properties for audio readings, reinforced with help by a board member who asked the same words Mr. Blazer had used, who then stated them again, creating a perception of unreasonable denial. Interestingly, the question never asked by that board member, whose career was in seeking truth, was the simple word – Why?

So why would a homeowner suffering from infrasonic frequencies, let a contractor who would not test for these effects inside their home, have access to their property? Would you sign a contract, allowing someone whom you knew as going to do shoddy work that only benefits someone else and hurts you, have access to your property?

Three times that night Mr. Blazer formed a contract with Vermilion County, stating, they would not stop until finding the cause. So will our legal council hold him to that contract? Will you make sure they deliver on their promise? Will Mr. Blazer really follow through? Doubtfull! Because they already know the cause, which is why they contractually retain top audio experts from the beginning, and then con you into thinking they really care, by perpetrating this charade.

Not convinced? Just call Falmouth Massachusetts and ask them about the turbines that can't be run because they were destroying their health and can't afford to dismantle at a million dollars each.

Of course our lapdog media, complicit in regular deceit of under, or non-reporting of words spoken here, continue their devious, collusive work, and, in the case of one newspaper, falsifying facts to make the afflicted parties seem like the bad guy's. A common thread, throughout all of the media's reporting on this issue.

Our Imperial world war on everyone has driven development of many new weapons, one is an infrasonic urban control system. A speaker system that can be mounted on an ATV, drove up to a crowd of thousands, activated, causing everyone in front of the speakers to instantly defecate themselves.

So tell me, even after coaching you on Infrasonic frequencies, not one of you bothered to ask why those frequencies were not tested inside homes, which is where they reveal themselves in "audible" painful tones. WHY? OH! And please, do tell, of the great windfall in county revenue from our hundred million dollar giveaway – that's helping reduce our taxes.

We see, virtually no testicular fortitude in this body, only mute servants to higher powers, steeped in secret handshakes, assured by ancient brotherhoods and enforced by subtle brutality.

We all know that you currently believe you have no power in these matters, it's also apparent that none of you here will stand against the corporate greed that now destroys our communities. You thought powerless in the beginning and believe powerless now - and they know it. Subliminally reinforced in a letter from Hervas, Condon & Bersani dated April 19th, if you even try - they'll sue us.

So those of us here speaking truth to power know this, some of you know it and the corporate robber baron's certainly know it. Now it's simply a matter of conditioning the sheeple to accept suffering in their homes, so they won't increasingly gather here, to confront their Judas representatives.

Joseph Kennedy once said; "Fifty men run America and that's a high figure". So we would like to know, who in this county runs you? Because from where we stand, it appears, you're not allowed to really question or challenge anyone - except those without wealth and power.
