Please find attached the amendment drafted pursuant to your request. It should be noted that there is no requirement that "zoning [be] in place" to enact ordinances concerning zoning. Therefore, we have include the general "notwithstanding any other provision of law" which would include zoning ordinances and any other local or state law that could possibly conflict and prevent a county or municipality from enacting ordinances concerning wind farms.

If you would like us to make any corrections or changes to the attached draft, please mark-up a copy of the draft with your changes. Thank you!
