Subject: my time

I took time few minutes ago to get my invoice out to Celeste that they require on a monthly basis, including my timesheet. I've attached the timesheet if you're interested. Fewer hours in September, of course, but still 70. So, even though I've been very conservative with accounting for hours, this put me at a cumulative of 381 as of the end of September. Our current arrangement maxs out at 400 for the year. Obviously, my October scheduled will clobber that

Nothing you need to deal with this week, but thought I should keep you apprised.
