

**INTERAGENCY AGREEMENT  
BETWEEN  
ILLINOIS DEPARTMENT OF PUBLIC HEALTH  
AND  
THE BOARD OF TRUSTEES OF ILLINOIS STATE UNIVERSITY  
AGREEMENT NUMBER # 38700004K**

The Illinois Department of Public Health (DPH) and The Board of Trustees of Illinois State University on behalf of the School of Social Work (ISU), pursuant to the Intergovernmental Cooperation Act, 5 ILCS 220/1 *et seq.*, hereby enter into this Interagency Agreement (Agreement) in connection with [REDACTED] data. DPH and ISU are collectively referred to herein as "Parties" or individually as a "Party." To fulfill the terms of this Agreement, the Parties agree to the following:

**ARTICLE I  
INTRODUCTION**

- 1.1 **Background.** Most states in the United States have little to no reliable estimates of either the number of persons who inject drugs (PWID) or the population of men who have sex with men (MSM). This challenge is experienced globally as well. Existing approaches to measure the size and patterns of behavior among these populations rely on statistical modeling using data from national surveys, resulting in estimations of these populations with significant variation. Public policy makers and researchers need to understand the size and characteristics of populations of persons at risk for [REDACTED]. Such information is critical to public health entities in assessing the likely impact of the spread of [REDACTED] and to guide the expenditure of resources to [REDACTED] prevention and intervention efforts. The U.S. Centers for Disease Control identifies populations of people at increased risk for [REDACTED] to include men who have sex with men and persons who inject drugs, among others.
- 1.2 **Purpose.** DPH has partnered with ISU, School of Social Work, to complete an estimated population survey. This study is novel in that it relies on primary data collection methods to assess the size of the MSM and PWID populations in Illinois more accurately and to describe their demographic characteristics beyond what is captured in public health [REDACTED] data.

**ARTICLE II  
DUTIES AND OBLIGATIONS OF THE PARTIES**

- 2.1 ISU shall:
- 2.1.1 Develop Survey Design
- 2.1.1.1 Sampling

The study will utilize stratified, random sampling procedures. Existing DPH data on the MSM and PWID populations in Illinois, geocoded by

census track, will form the basis for the identification of 4-5 strata for the State of Illinois. Proportional allocation to strata will be used to divide the sample among the strata and will guide the number of surveys to be administered in each stratum. Using State Characteristics Population Estimates (U.S. Census Bureau, 2021), the statewide sampling frame for the address based, telephone number (cell and landline) matched sample will include males and females aged eighteen (18) years of age or older.

### 2.1.1.2 Instrumentation & Data Collection

- 1.) The instrumentation includes one survey to be administered using Address Based Sampling (ABS). The purchased sample will match addresses with existing phone numbers (land and cell) necessary for increasing the response rate.
- 2.) Data collection will elicit both population estimates to be utilized in the [REDACTED] calculations for the State of Illinois and describe the size and demographic characteristics of the MSM and PWID populations residing in Illinois for the purpose of public health resources allocation.
- 3.) Instrument design to be completed by January 1, 2023.
- 4.) Data collection shall end on June 30, 2023.

### 2.1.1.3 Survey

A single survey containing approximately 15 items will be administered via mail with the option to return the survey as a hard copy or to complete the survey electronically using a URL. The survey will contain item stems exploring both sexual orientation and behaviors, as well as injection drug use behaviors. The data collection plan targets 5,000 surveys. The survey will be in both English and Spanish.

### 2.1.1.5 Survey Procedures

- 1.) Mailing of an invitation letter with web link plus mailed hardcopy questionnaire with a Business Reply Envelope (postage paid). For participants completing the survey as a hard copy, they are invited to return a postage paid postcard (separate from the survey) indicating their choice for subject remuneration and remittance information. Subject remuneration will include a choice of digital gift card (Target, Walmart, Amazon or Visa prepaid) or a hard copy check.
- 2.) Reminder letter.
- 3.) Phone follow up of nonrespondents, with English and Spanish speaking interviewers (done by purchasing telephone numbers matched to the addresses from the sample file).
- 4.) Thank you/incentive payment with \$12 incentive for completing.

### 2.1.1.6 Deliverables

- 1.) Data file of approximately 5,000 surveys will be administered to identified Illinois residents.
- 2.) Report summary of findings to include population estimates and description of demographic characteristics
- 3.) Send progress reports on March 31, 2023
- 4.) Analyze data and write up reports by October 2023
