Construction estimate State Park Pavillion

All estimates complete with all subcontractors (if needed) included

Excavate earth and remove existing concrete pad .

Form and pour necessary 4" thick concrete pad necessary for described pavillion inclusive of all 6 (six) pier supports where posts are to be located. Concrete slab will be reinforced with 1/2" rebar for stability.

All dimensional lumber in contact with concrete will be pressure treated with necessary ACQ fasteners used. All other materials will be of yellow pine in nature as is standard in building code requirements.

Purchase and erect necessary material to erect a 20' x 24' pavillion at the State Park Recreation Area to include all overhangs, lumber, soffet, facia and necessary siding. The steel roofing material is to be provided by others but installation is included within this estimate.

Finish ceiling is NOT included in this estimate as advised will be done at a later date due to costs.

Construction refuse will be the responsibility of Nameoki Township as to the concern of individuals rummaging through a dumpster on site.
